Master of Science, Business Analytics

Fordham University, Gabelli School of Business | New York, NY

Expected Dec 2027

Activities: Capital Markets Club; Investment Club

Bachelor of Science, Business Economics

SUNY Cortland | Cortland, NY

Aug 2024

EXPERIENCE

Founder & Product Lead

Buttonwood Markets | New York, NY | buttonwoodmarkets.com

Mar 2026 – Present

- Built and launched a subscription equity-research service, acquiring 10+ paying customers and converting financial statements, earnings, valuation, market behavior, news, and risk evidence into short- and long-horizon ratings and monitoring warnings.
- Implemented source-provenance, stale-data, and validation controls across Python, PostgreSQL, and external API workflows; investigated discrepancies across ingestion, calculation, and customer-facing outputs.
- Built dated score histories and monitoring workflows to investigate anomalous rating movements and distinguish new market information from data-quality issues.

Sales Development Representative

Citizens Debt Relief | New York, NY

May 2025 – Aug 2025

- Analyzed customer debt, income, cash flow, and eligibility during high-volume consultations; translated financial tradeoffs clearly and met a \$220,000 monthly enrolled-debt quota in each of the first three months.
- Documented customer requirements and coordinated complex cases across underwriting, legal, and onboarding teams while working within eligibility and compliance constraints.

Lease Administration Analyst

Spinoso Real Estate Group | Syracuse, NY

Oct 2024 – Feb 2025

- Converted commercial lease obligations into structured financial records; reconciled discrepancies, investigated monthly variance drivers, and prepared annual budget reports in Excel for a retail property portfolio.

PROJECTS

Alpha Capital – Systematic Equity Research Platform

Python · PostgreSQL · scikit-learn · GCP · jebfarneth.com/alpha

2026

- Built Python and PostgreSQL pipelines integrating six external APIs into more than 2 million lineage-tracked rows across 13,000 securities; standardized market data for repeatable analysis on GCP.
- Evaluated logistic regression, random forest, and gradient-boosting models under survivorship, leakage, transaction-cost, and purged walk-forward controls; identified full-day look-ahead bias and documented a no-go decision.

Enron – Organizational Risk Analytics

Python · NLP · NetworkX · D3.js · jebfarneth.com/enron

2026

- Analyzed 517,401 emails and a 200-employee network using NLP, NetworkX, and agent-based departure simulations to assess knowledge concentration and organizational vulnerability.
- Tested 18 findings against primary government records; documented 72% concordance, contrary evidence, known misses, and corpus limitations in an interactive review tool.

LEADERSHIP & SKILLS

Investment Club — Presentation Coordinator

SUNY Cortland | Cortland, NY

Sep 2023 – May 2024

- Led equity-pitch presentations evaluating company fundamentals, valuation, market catalysts, and downside risk; synthesized research into concise investment recommendations.

EOP & Economics Peer Tutor

SUNY Cortland | Cortland, NY

Sep 2023 – May 2024

- Selected by faculty for three concurrent tutoring roles; coached 30+ students in macroeconomics, corporate finance, regression analysis, and asset pricing.

Risk & analytics: Financial analysis, model validation, scenario testing, data quality, data lineage, variance analysis, stakeholder communication

Technical: Python, SQL, PostgreSQL, pandas, scikit-learn, APIs, GCP, Git, Excel, PowerPoint
